

Climate change & Disinfo

Funded by the European Union

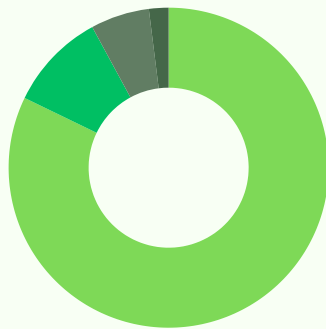

Data collected in the course of the RADAR Public Debate "Dismantle Disinformation on Climate Change", co-organised between the Trans European Policy Studies Association and the Institut für Europäische Politik.

WHAT DO EUROPEANS MAKE OF DISINFORMATION ON CLIMATE ISSUES?

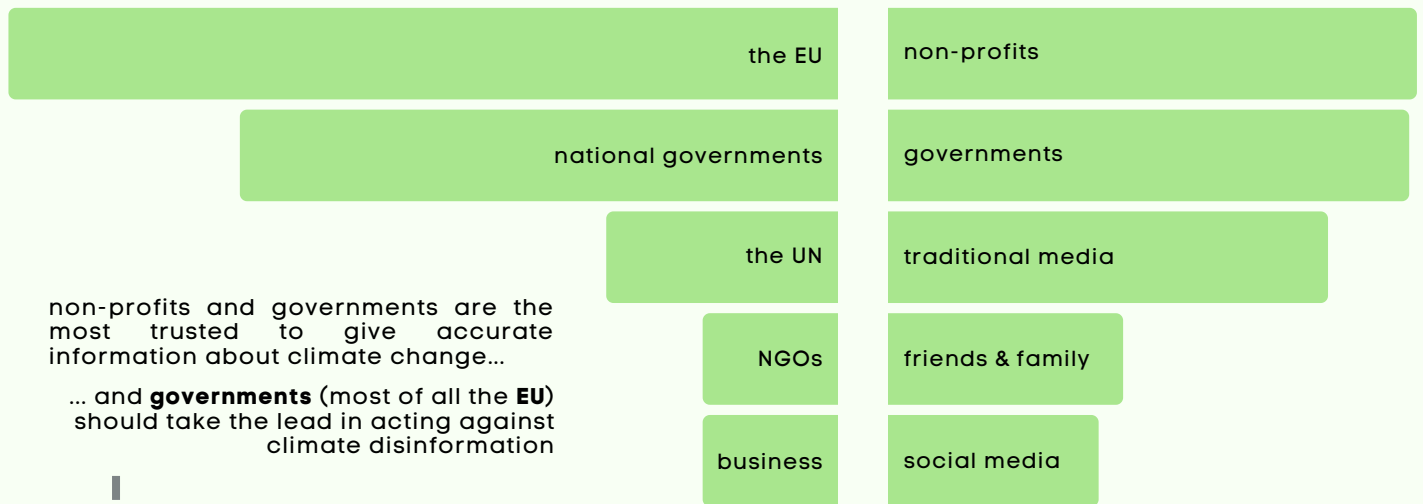

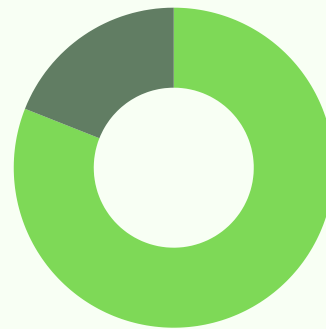

83 % think climate change is targeted a lot by disinformation...

... and 81 % believe it's possible to combat climate disinfo

10 % a little
6 % not so much
2 % don't know

19 % disagree

non-profits and governments are the most trusted to give accurate information about climate change...

... and **governments** (most of all the **EU**) should take the lead in acting against climate disinformation

Which tools would be most effective in fighting climate disinformation?
